OCT - 7 2011

Federal Communications Commission
Office of the Secretary

Dear Ms. Dortch:

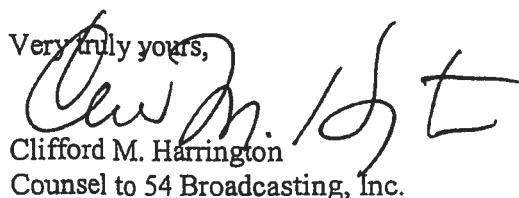

**Re: Reduced Power Operation
Television Station KNVA, Austin, Texas
Facility ID No. 144**

On behalf of our client, 54 Broadcasting, Inc., this is to advise the Commission that commercial broadcast television station KNVA, Channel 49 (Virtual Channel 54), FCC Facility ID 144, Austin, Texas, experienced a tube failure on September 28, 2011, that has prevented the station from achieving stable full power operation. The station is currently operating with a reduced power level of 325 kW. No other parameters have changed.

The replacement tubes necessary to repair the KNVA transmitter are en route, and it is anticipated that the station will be restored to full power operation within the 30 day period contemplated by Section 73.1560(d) of the Commission's Rules. In the event that causes beyond the control of the licensee prevent restoration of the authorized power within 30 days from the date reduced power commenced, a request for Special Temporary Authority will be submitted on a timely basis.

Please address any questions concerning this matter to the undersigned.

Very truly yours,

Clifford M. Harrington
Counsel to 54 Broadcasting, Inc.
